

Do You Have a Long Term Health Condition?

Patient Initiated Follow-Up (PIFU)

PIFU is designed to allow you to access clinical teams when you feel you need to get help with your condition, or for example if you have a flare up of symptoms.

This means rather than having a prearranged or regularly scheduled appointments you can access help when you need it the most.

Moving on to a PIFU pathway will always be an agreement between you and the clinician, you will be provided with information regarding symptoms to look out for and contact details for the service.
